July 1, 2022

Dear Customers,

City of Celeste PWS ID 1160002 has violated the monitoring/reporting requirements set by the Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30 Tac), Section 290, Subchapter F. Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfection residuals within the distribution system, monitor the disinfectant residual at various locations throughout the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis.

Results of regular monitoring are an indicator of whether or not your drinking water is safe from microbial contamination.

This/These violations occurred in the monitoring period(s) First Quarter 01/01/22-03/31-22 of the Disinfectant Level Quarterly Operating Report.

The following actions are being taken to address this issue:

- This Public Notice required by TCEQ has been posted in the City of Celeste lobby.
- This Public Notice required by TCEQ has been posted online at www.cityofceleste.org.

The City of Celeste assures that at no point did the chlorine disinfectant residual fall below the minimal amount required by TCEQ and that the quality of water was safe to consume. This is a reporting issue, NOT a monitoring issue.

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have any questions regarding this matter, you may contact Celeste City Hall at 903-568-4512.

Thank you,

Shaunna Cole
